

This month's student spotlight reflects on Miss Jonajah. She is a 3<sup>rd</sup> grader at Bugg Elementary and has attended The Daniel Center for Math and Science since 2015. Jonajah has demonstrated high academic achievement on her progress reports and report cards. Jonajah loves reading and excels in mathematics. Jonajah shows great leadership skills and is currently serving as a mentor to the younger students at The Daniel Center for Math and Science. Because of her love for mathematics and logic, in her free time she participates in a computer coding program called "Black Girls Code". We are so proud of Jonajah and her achievements!
